PROFESSIONAL PROFILE

Technical Product Owner with over 12 years of experience in financial services and regulated environments, combining a strong software testing foundation with hands-on product ownership at Mastercard. Proven ability to bridge engineering teams and business stakeholders - writing clear API-driven user stories, owning sprint backlogs, and driving delivery in SAFe Agile environments. Comfortable working with REST APIs, Postman, Swagger, and SQL, with a practical, collaborative approach to working alongside developers and QA. Actively developing AI product knowledge with practical application of AI tools in product workflows. SAFe POPM certified and targeting Tech Product Manager role, where technical credibility, quality-driven delivery, and product craft are genuinely valued

CORE COMPETENCIES

Backlog Ownership & Prioritisation	REST API Story Writing & Testing	SAFe PI Planning & Refinement
Acceptance Criteria & Definition of Done	Stakeholder Requirements Gathering	Financial Services Domain

PROFESSIONAL EXPERIENCE

FBD Insurance

Dec 2023 – Present

IT Business Analyst (operating in hybrid BA / Product Owner capacity)

- Functioned in a de facto product ownership capacity within project teams operating in a insurance environment - owning the JIRA backlog, writing user stories and acceptance criteria, and leading sprint elaboration - reflecting FBD's BA-led team structure.
- Led story creation and backlog prioritisation for a major digital transformation migrating 14 insurance products from paper-based proposal forms to a fully paperless Statement of Fact - translating CBI regulatory and business requirements into clear user stories and acceptance criteria for cross-functional project teams (UX, engineering, QA), ensuring all features met compliance and data protection obligations under GDPR.
- Defined and prioritised features for onboarding and full lifecycle implementation of a third-party insurance platform covering New Business, MTAs, and Renewals for broker motor products.
- Delivered Power Automate workflows and Power BI reports to automate customer quote pack document generation and operational reporting, reducing manual effort and improving data accuracy; Applied Microsoft Copilot and AI-assisted tools to accelerate story drafting, acceptance criteria generation, and requirements synthesis.
- Collaborated with engineering to assess business impact of enterprise-wide SQL Server infrastructure upgrade; coordinated UAT across core systems, data warehouse, and e-commerce platforms.
- Supported Privacy Impact Assessment (PIA) and Legitimate Interests Assessment (LIA) for a vendor data integration initiative involving personal data, enabling data held in a third-party system to be brought into internal reporting
- Gained practical exposure to Large Language Models through hands-on usage of tools like Grok/Claude/OpenAI and Actively building expertise in AI Product Management, including prompt engineering, LLM fundamentals, basic model behavior (training/validation concepts), and understanding of agentic AI for workflow automation

Mastercard

Jan 2021 – Dec 2023

Senior Technical Product Manager (TPO)

- Owned backlog and PI planning for two compliance-critical product streams: Consumer Controls (API-driven fraud prevention, transaction alerts, and card security rules used by global financial institutions) and Digital Identity Services — products operating under PCI-DSS, GDPR, and financial regulatory requirements across multiple markets.
- Wrote and managed technical user stories in ALM Rally for API-centric and data-driven features including new REST API creation, monolith-to-microservices migration, GDPR consent and cookie management, fraud rules configuration, and application decommission - consistently ensuring stories met compliance, security, and data protection standards.
- Led sprint refinements and estimation sessions end-to-end with scrum teams; presented feature elaborations to wider PI audiences and supported feature demos and UAT sign-off for product managers.
- Worked with integration and API teams on technical story definitions, acceptance criteria, and cross-team dependency management across multiple squads in a SAFe scaled environment.

Fidelity Investments

Dec 2020 – Dec 2021

Senior Systems Analyst – Salesforce

- Led requirements gathering and user story creation for migration of data and processes from legacy systems to Salesforce, working across business, product, and engineering teams.
- Designed and configured Salesforce solutions including custom objects, Lightning screens, process automation, and case management for an Investment Research Services POC.
- Managed backlog, sprint planning, and change requests; executed functional and UAT testing of Salesforce capabilities.

Fidelity Investments

May 2015 – Dec 2020

Senior QA Engineer

- Led QA strategy, planning, and coordination across multiple squads on the Commissions Manager application - covering test plans, manual and automation execution, and release regression/UAT with business stakeholders and vendors.
- Drove adoption of API automation suite (FitNesse) for REST and data testing, significantly improving automation coverage and testing efficiency across integration-heavy financial services applications.
- Hands-on testing of commissions and reporting systems with primary focus on API testing (Postman, FitNesse), data validation (ICEDQ, SQL), and reporting validation (OBIEE).

Tata Consultancy Services - Client: Citibank USA

Jan 2013 – Aug 2014

Test Analyst / Module Lead

- Delivered integration and regression testing across multiple banking product streams including Account Opening, Fraud Detection, Rewards, and Statements consolidation.

Tata Consultancy Services - Client: Lloyds Banking Group UK

Feb 2010 – Mar 2011

Assistant Systems Engineer

- Supported HBOS/LTSB data migration project - requirement traceability, build sanity testing, and defect reporting using Quality Center.

TECHNICAL SKILLS

Product Tools	JIRA, ALM Rally, Confluence, Miro
API & Testing	Postman, Swagger, FitNesse, REST API testing, SQL (Oracle SQL Developer)
Agile Frameworks	SAFe (PI Planning, Refinement, Iteration Planning), Scrum
CRM & Analytics	Salesforce (Admin Certified), Power BI, Power Automate
Automation	Selenium WebDriver, Cucumber, FitNesse Wiki, HP QTP
AI Tools	Microsoft Copilot (story drafting, AC generation), NotebookLM (requirements synthesis, edge case generation), Exposure to AI Products Management Basics : (usage of LLM tools in Applied AI

	products,Models-understanding of how they are trained/validated,prompt engineering fundamentals,agentic AI tools, IDEs- cursor, AI website/App builders - Base44,AWS PartyRock)
Other	MS Office Suite, Citrix XenApp, VMware

EDUCATION & CERTIFICATIONS

SAFe PO/PM Certification	Aug 2023
BCS Practitioner Certificate in Requirements Engineering	Jun 2025
BCS Foundation Certificate in Business Analysis v4.1	Jul 2024
Salesforce Administrator Certification	2020
ISTQB Foundation Certification	2013
B.E. Computer Science Engineering — Anna University, Chennai	2009

AI CaseStudy –

Product Name – NutriMed Ask (RAG prototype product built as part of product management coursework)

A nutrition/medical assistant for Irish Nutrition & Dietetic Institute (INDI) that supports users(public) with medical conditions by helping them understand their disease,nutrition,diets,treatments for their disease/illness and thereby giving them ability to manage their health condition with confidence and have better outcomes
